1. Create account on Deliverect & set it up.....	2
2. Setup the created Deliverect account on posapis.com	3

A. Abstract:

This document explains the steps required to enable integration with Deliverect to upload (products, categories, ...) to Deliverect.

B. Requirements

- Create a store account on Deliverect from the Deliverect admin panel. Create locations for that store (branches) and set an order webhook.
- Set up Deliverect client on posapis.com in <https://posapis.com/admin/stores>.

C. Configuration Steps

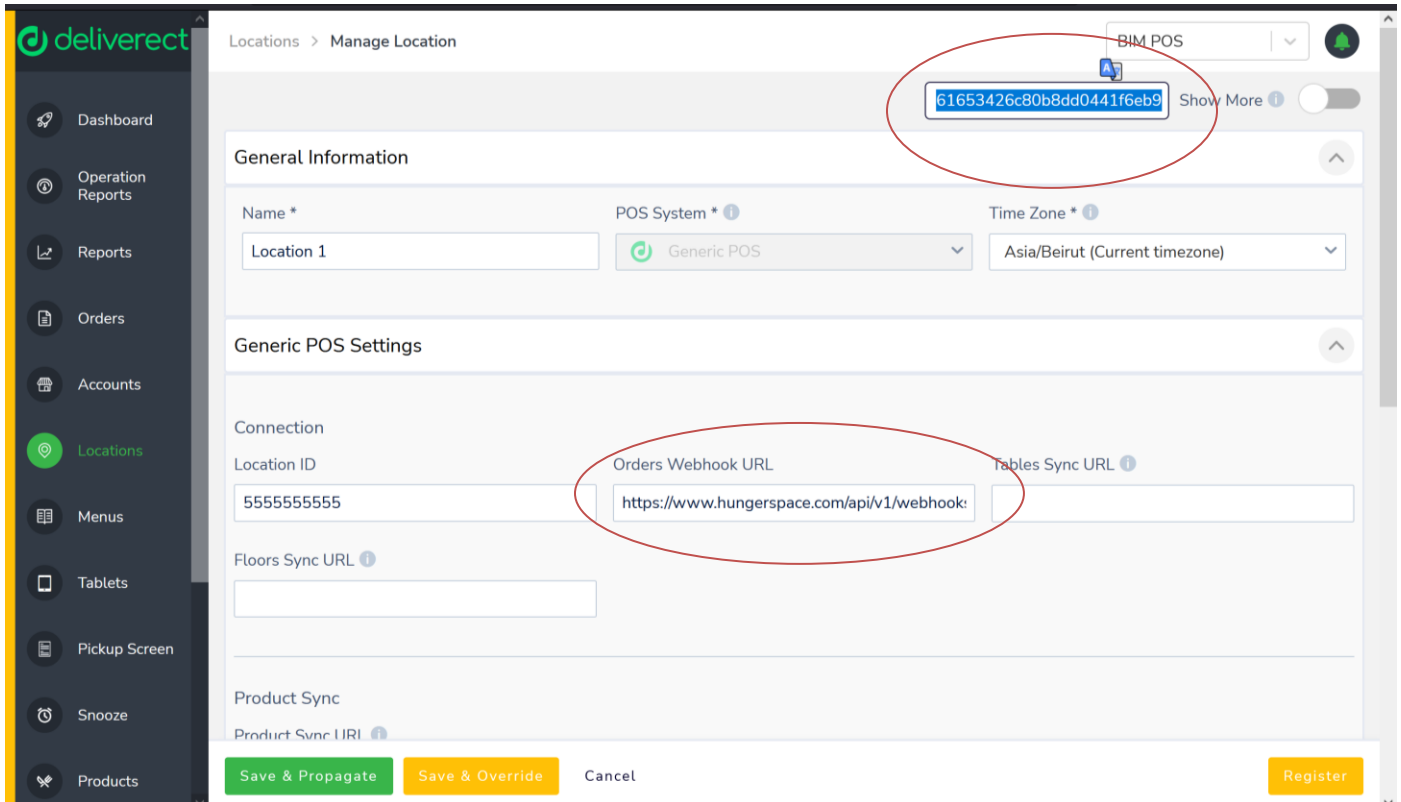

1. Create account on Deliverect & set it up

- On the Deliverect admin panel, visit accounts and create an account for a certain store to get the account id.

The screenshot shows the Deliverect admin interface. On the left is a dark sidebar with navigation icons and labels: Dashboard, Operation Reports, Reports, Orders, Accounts (highlighted), Locations, Menus, Tablets, Pickup Screen, Snooze, and Products. The main content area is titled 'Accounts' and includes a 'Filter' button, a dropdown menu set to 'BIM POS', and a '+ Add Account' button. Below this, it says 'Showing 2 of 2 Accounts'. There are two account entries:

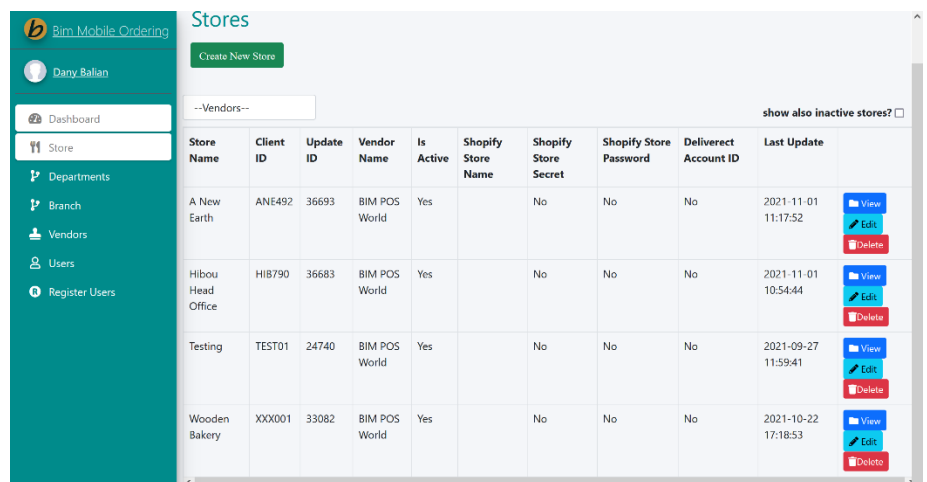

Account Name	Type	Locations	Users	Account ID	Action
BIM POS	PARTNER	2	7	5fd4bcfeece7bc2c126cdd38	SWITCH TO ACCOUNT >
BIM POS - Test Customer	CUSTOMER	2	0	5fd4bd88093ebf5dd75921d9	SWITCH TO ACCOUNT >

- Then on Deliverect admin panel, visit locations and create locations (branches) for the created account. For that location we assign the order webhook link: <https://posapis.com/api/v1/webhooks/orders/deliverect>

2. Setup the created Deliverect account on posapis.com

- In <https://posapis.com/> log in as administrator, and in <https://posapis.com/admin/stores> edit the store you want to assign Deliverect to, copy the created account id above and paste it in the store edit page and save it.

- In <https://posapis.com/> go to <http://posapis.com/admin/branches> edit the branch that was created on Deliverect above, and paste the created location id created on Deliverect in the branch “Deliverect Location ID”.

The screenshot shows the 'Branches' management page in the Bim Mobile Ordering system. The page title is 'Branches' and it includes a toggle for 'show also inactive branches?'. The table below lists several branches, each with a unique Client ID and Deliverect Location ID. The 'Is Active' column indicates the status of each branch.

Branch Name	Branch Address	Branch Phone	Branch Email	Client ID	Deliverect Location ID	Is Active	Last Update
